

Highlights

- Team player with ability to work under minimal supervision
- Excellent technical, analytical & problem-solving skills
- Strong sense of ownership
- Mentoring junior engineers
- Passion for high quality code

Achievements

- Implemented a generic internal library to fast-track application deployments into AWS Cloud
- Improved email delivery mechanism by caching huge images to avoid reprocessing
- Lead a team towards delivering order management system impacting the whole enterprise
- Improved bottlenecks & reduced memory leaks in REST APIs analyzing heap dumps
- Well versed in secure java coding practices

Key Skills

- Java, JSON, HTTP, TLS, REST
- AWS Cloud, SQL, NoSQL
- JavaScript, jQuery, HTML5
- Microservices, Kubernetes
- GraphQL, Golang, Helm charts
- Hashicorp Vault & Terraform
- Git, Linux, Shell Scripting

Education

Bachelor of Engineering, 2002-06
Satyabhama Institute of Science & Technology, Chennai, India

Summary

- Results oriented software engineer with over 15 years of experience in design, development and deployment of highly scalable, fault-tolerant software applications using both client/server and modern cloud native technologies.
- Experienced in developing highly scalable & performant APIs using java, REST, Kubernetes, Docker, MySQL, and AWS services.
- 10+ years of working with remote and cross-functional teams

Professional Experience

10/2018 – Present Software Principal Engineer, SecureWorks Inc, Atlanta

- Designing Counter Threat Platform backend integration with Taegis
- Streamlined deployment of several microservices to AWS
- Lead the team's initiatives towards AWS Cloud Migration
- Lead efforts to be compliant on software export tracking
- Responsible for REST API microservices utilized by IDS/IPS systems
- Integrated CTP microservices with API Gateway

04/2017 – 10/2018 Software Senior Engineer, SecureWorks Inc, Atlanta

- Lead Vuln Services Migration from C++ to Java
- Designed and developed Threat Intelligence (TI) for customer portal
- Implemented responsive design for UX components in TI
- Implemented ratings for TI Articles and library documents
- Implemented spring security impersonation for portal users
- Rewrote TI Lucene indexing to improve performance of TI Search

05/2013 – 04/2017 Software Staff Engineer, SecureWorks Inc, Atlanta

- Implemented TI Global search, feeding UI Widgets from RSS feed.
- Built caching of ct-prov contacts, clients, and locations to improve performance in intel-batch to improve email delivery
- Integrated email processing of TI articles with Notification systems
- Implemented retrieval of counter measures from blobstore servers
- Modularized monolithic code structures for better maintenance
- Implemented D3.js to represent attack sources, vectors & types

05/2013 – 05/2013 IT Analyst, TCS Ltd, Atlanta for The Home Depot, Inc.

- Designed & developed Common Ordering System to interact with Sterling Order Management Systems and Enhanced Special Services
- Designed & developed Buy Online Pickup in Store, eCatalog, Asset protection, Perpetual Accuracy, merchandise xfer between stores

06/2006 – 11/2008 Assistant Systems Engineer, TCS Ltd, Kolkata, India

- Implemented solutions for New organizational hierarchical changes for Somerfield stores, adding business partners, Gap analysis tool
- Reduced batch operation runs from 90 minutes to 5mins
- Responsible for data Modeling and developing queries/stored procedures with proper optimization and performance tuning
